## High-flying careers for a better environment.

**Prof. Dr. Johann Fellner**  
Academic Director TU Wien

» Multidisciplinary education is essential for nurturing a deep understanding of today's complex environmental challenges, enabling graduates to develop sustainable solutions that address the complexities of our world. «

**Prof. Dr. Holger Hestermeyer, LL.M. (Berkeley)**  
Academic Director Vienna School of International Studies

» To address current and future community challenges, a multidisciplinary approach is essential. Few programs offer the comprehensive skills provided by ETIA. «

Over the last few years environmental challenges have taken on a new urgency on a local, regional and global level. In particular, issues regarding the protection and sustainable use of environmental resources have become an existential concern. This puts increasing demands on decision-makers, who require a broad knowledge and understanding of the political, legal, economic and technical issues involved. Everybody concerned, whether as representatives of ministries, international organizations, NGOs or the private sector, has to deal with an ever increasing range of environment related questions.

The ETIA postgraduate MSc Program enables graduates to understand and analyze the relevant scientific and technical issues at the same time as providing them with a sound knowledge of international affairs in order to deal with both current and future challenges concerning the environment and sustainable development.

This interdisciplinary MSc is a cooperation program between TU Wien and the Vienna School of International Studies. It is a pioneering project in its combination of international issues and environmental technology.

### TU WIEN

#### **Technology for People – Developing Scientific Excellence and Enhancing Comprehensive Competence**

TU Wien is the largest Austrian institution in research and education within the fields of technology and natural sciences. The beginnings of TU Wien reach back more than 200 years.

Today the University finds high international and domestic recognition in teaching as well as in research and is a highly esteemed partner of innovation oriented enterprises. For years, TU Wien has been successfully offering outstanding postgraduate programs. This success is based on the top scientific and economic qualifications of its faculty.

### DIPLOMATISCHE AKADEMIE WIEN

#### **Vienna School of International Studies Educating Global Leaders since 1754**

The Vienna School of International Studies is a postgraduate school of European and international studies preparing university graduates for a career in the diplomatic service, international organizations or international business. Its interdisciplinary study programs aim at providing the academic expertise, personal skills and intercultural competence required for international careers. A former imperial palace is the location for campus life at the Vienna School of International Studies: students coming from more than 50 different countries constitute a diverse student body, which ensures that "internationalism" and "intercultural communication" are a daily experience.

## Curriculum

The two-year MSc Program embraces a wide range of topics and is divided into two distinct segments. After a general introduction to international relations, the international studies segment deals with the major political, economic, historical and legal issues concerning the environment and sustainable development. The focus of the technical and scientific segment is on the quality management of air, water and waste; the management of resources and energy, as well as climate change.

### First Year – Vienna School of International Studies

MODULE A	<p><b>Political Science and International Relations</b> Introduction to Political Science • Introduction to International Relations • European Security: Concepts, Challenges, Institutions* • American Foreign Policy* • Conflict Resolution in World Politics* • Ethnic Conflict* • Post-Soviet Russia – Part I and II* • Seminar on Security Politics and Strategy in Cyber Space* • Seminar: America and the World since 1945* • Latin America – international and regional setting</p>
MODULE B	<p><b>International and European Law</b> Principles of International Law • Institutional Law of the European Union • International Economic Law and Institutions • International Environmental Law and Institutions aiming at Sustainable Development • Seminar: Environmental Security • Human Rights System* • Legal Foundations of International Relations* • Selected Areas of Substantive EC-Law* • European Law: External Economic Relations and Foreign Policy in the EU* • Seminar on External Economic Relations and Foreign Policy in the European Union* • Seminar on Human Rights in South-East Europe* • IOs and multilateral Diplomacy • International Criminal Justice</p>
MODULE C	<p><b>International Economics</b> Principles of Economics • Principles of International Economics • Development Economics • Environmental Economics • Energy Economics* • Digital Economics* • International Monetary Theory* • International Trade Theory*</p>

MODULE E	<p><b>Optional Courses</b> (*elective courses in Modules A–D)</p>

### Second Year – TU Wien

MODULE A	<p><b>General Topics and Seminars</b> Basics of Mathematics and Physics for Environmental Studies • Basics of Chemistry for Environmental Studies • Environmental Science &amp; Technology Seminars (Students presentations and Guest Lectures) • Excursions</p>
MODULE B	<p><b>Surveillance and Sustainable Development</b> Environment and Society in Long-Term Perspective • Climate Change and Climate Control • Environmental Impact Assessment • Environmental Conventions • Environmental Meteorology • Global Environmental Monitoring – Remote Sensing • Nuclear Energy and Safety</p>
MODULE C	<p><b>Air, Water and Waste</b> Atmospheric Composition and Chemistry • Air Quality and Monitoring • Water Resources – Availability, Demand and Supply • Water Resources – Ecological Criteria and Management • Waste Water Technology and Management • Resources and Waste Management – Urban Metabolism and Waste Management, Resource Management and Evaluation Methods, Landfilling and “Final Sinks”</p>
MODULE D	<p><b>Environment and Technology</b> Technology of Pollution Control • Energy and the Environment • Renewable Energies • Traffic and the Environment • Introduction to Environmental Project Management</p>

### Master’s Thesis

MASTER'S THESIS	<p>The MSc Program is concluded with a Master’s Thesis.</p>
-----------------	---

## Program, Objectives and Goals

### PROGRAM OBJECTIVES

The combination of studying environmental issues both from the technical and the international relations points of view prepares graduates for high-flying careers as managers and engineers, as well as for political and diplomatic tasks in the fields of the environment and sustainable development. Graduates of this course are able to assess and analyze problems from a legal, economic, scientific and technical standpoint and take active part in implementing and managing new standards. Professional Master programs like the MSc ETIA have a strong focus on a professional career development.

### TARGET GROUPS

University graduates of all disciplines and nationalities who aim at a career in the field of international environmental management, in private businesses and organizations dealing with the current and future challenges of the environment and sustainable development.

### ADMISSION REQUIREMENTS

An internationally recognized first degree in any field of study is required to be eligible for admission. An excellent command of English is a prerequisite for admission. Non-native speakers need to furnish evidence of their language skills. The following certificates are recognized:

- First degree in English (i.e. major in English translation/ interpretation)
- CPE
- IELTS (minimum 7.0) or
- TOEFL (minimum 627 points (written), or 263 points (computer based) or 106 points (Internet based)).

### FINAL DEGREE

The MSc Program is concluded with a master's thesis. The final degree "**Master of Science in Environmental Technology & International Affairs**" MSc is awarded by TU Wien.

### LANGUAGE OF INSTRUCTION

The MSc Program is taught in English. Optional courses taught in French or in German are offered as well.

### FACULTY

The members of the ETIA faculty are internationally renowned experts distinguished both for their profound interdisciplinary scientific knowledge and their extensive practical experience in the fields of environmental technology and international affairs.

# A master's program that combines the two most important topics for future generations.

**Prof. Dr. Norbert Kreuzinger**  
Institute for Water Quality, Resources and Waste Management, TU Wien

»» *Research into today's environmental challenges is continuously driving information and scientific knowledge forward – further and further in a direction where the understanding of action-reaction patterns or pressure-response systems is really complex. As a result, the gap between cutting edge science and society has increased tremendously. Few people are able to bridge that gap, particularly when the socio-economic, cultural and political implications of implementing sustainable and acceptable solutions are taken into account. I think that this MSc Program provides a unique opportunity to get an insight into both of these 'worlds'. It is not about creating the front end environmental scientist or diplomat. It is about building a bridge between science and society.* ««

# Highlights

- Know-how and skills for sustainable global development
- Unique combination of international affairs, law, economics, technology and natural sciences
- Sustainable impact & career opportunities in politics and business
- Prestigious faculty members with research and business backgrounds
- Degree granted by two internationally renowned institutions
- International students with interdisciplinary backgrounds
- Study in Vienna – one of the most liveable cities in the world

## Student's Profile

49 Nationalities

3 % Dipl.-Ing./Dipl.-Ing. (FH)

6 % Mag./Mag. (FH)

69 % Bachelor

11 % Master

11 % Other degrees

**Lejda Toçi, BSc MSc** (Crime Prevention and Criminal Justice Officer, United Nations Office on Drugs and Crime), Alumna Class 2014–2016

» I think the ETIA offers a very valuable expertise on what is the grey area between science and diplomacy, which is increasingly a challenge in today's world. Being able to understand today's environmental challenges such as the climate crisis, the rapid loss of biodiversity etc. at a scientific level and at the same time having the ability to put them in the very complex context of international relations, has provided me with a very valuable asset for my career in multilateral diplomacy. «
