

MISSION STATEMENT

VISION

We open up a world of knowledge for everyone by connecting people and science.

MISSION

Located at the heart of TU Wien and the city of Vienna, TU Wien Bibliothek is Austria's biggest library for science and engineering. We are committed to creating, sharing, disseminating and preserving knowledge through sustainable infrastructures. We provide spaces for discourse and empower people to engage with the digital world in an autonomous, critical and proactive manner.

VALUES

We contribute to a democratic, well-informed and inclusive society. Our library is meant to serve as a third place for people to meet and get inspired.

We take responsibility for providing a green library and ensuring the sustainable management of our cultural heritage.

Engaging with our users is an incentive for us to develop services that add value. Our institutional, national and international partnerships are essential to this endeavour.

Openness is a key principle of our work, in both our attitude and our services. We are solution-oriented and self-reflective, and we believe in personal responsibility, mutual respect, fairness, transparency and trust. Every single one of us is involved in shaping the library for the future.

Together we can do more – we employ our broad expertise and skills, our diversity and curiosity. We are not afraid to experiment with new ideas and have the courage to fail. Our commitment to lifelong learning helps us grow with new tasks.

The spirit of collective creativity allows us to respond to constantly changing challenges with agility and resilience. We are focused on the future.
