

Dear Student & Staff Exchange Services Team,

My name is Alejandro Felix, and I am the Principal Architect at AFA, based in Barcelona, Spain. We are a young practice that I founded in 2022 after working at David Chipperfield Architects for seven years. We are currently engaged in residential projects in Spain and the UK, as well as an office tower in Taiwan, in collaboration with David Chipperfield Architects. We regularly participate in competitions for social housing, public buildings, and urban public spaces, with a strong commitment to local context and social value. You can visit our website at alejandrofelix.com to learn more about our work.

We are currently offering internship opportunities for architecture students through the Erasmus+ program and would be delighted to host students from TU Wien at our studio. The internship would involve drafting assistance with design projects, 3D modeling, physical modelling, and participation in the creative process.

Key details:

1. **Duration:** 2–6 months, possible to start from January 2026 onwards
2. **Location:** on-site at our studio in Barcelona, Spain at *C/Provença 385, 6o, 3a, Despacho D, 08025*
3. **Compensation:** Although unpaid, this internship offers hands-on experience, close mentorship, and active involvement in our projects. Students may of course apply to Erasmus + funding to support their stay.
4. **Supervisor:** Alejandro Felix, I will personally supervise the intern.
5. **Language:** The internship is conducted in English and knowledge of Spanish is a plus.

We are happy to provide any additional documentation your university may require to formalize the internship. We are also prepared to sign the necessary agreements, including the Learning Agreement and a training plan outlining the intern's responsibilities and learning objectives.

Could you kindly advise on the procedure and documentation required for establishing an Erasmus+ internship collaboration with TU Wien?

Thank you very much for your time and consideration. We look forward to the possibility of welcoming one of your students to our studio.

Kind regards,

Alejandro Felix
