

## Instructions for Students COVID-19 protective measures at the TU Wien

This instruction refers to the COVID-19 protective measures valid at the TU Wien.

Contents of the instruction:

General Instructions: <ul> <li>wash your hands regularly</li> <li>keen the distance</li> </ul>
<ul> <li>keep the distance</li> <li>mind the correct coughing and sneezing etiquette (use the crook of your arm)</li> </ul>
<ul> <li>avoid hand-shaking and physical contact</li> <li>forming groups in the buildings or in the premises of the TU Wien is prohibited</li> </ul>
<ul> <li>should you feel any physical discomfort or sickness, it is possible to sign yourself out the exam in the short term</li> <li>in case of sickness, stay at home under all circumstances!</li> </ul>
<b>Keeping the Safety Distance:</b> The most important measure to fight against COVID-19 is keeping the safety distance at least 1 m (ideal case at least 1,5 m). This distance must be observed within all TU Wien areas.
<b>Protective Masks:</b> The FFP-masks must be worn by all students before entering the building until leaving the building. The wearing of masks is mandatory in all general premises of TU Wien. The minimum distance of 1 meter (ideally 1,5 m) is to be kept despite wearing the mask. The masks can be removed during the exam.
<b>Preventative and Hygiene Measures:</b> Wash your hands regularly and thoroughly with soap. This is less harmful for the skin than disinfecting and maintains the skin barrier necessary to protect against infection.
Disinfection points are located at each entrance. You can disinfect your hands immediately after entering any of the TU Wien buildings.
All areas, where exams or distance learning take place, are cleaned and disinfected more times a day by the cleaning service staff.
Table surfaces are cleaned and disinfected after each exam. There is a hand disinfection provided in each teaching room.
Generally: Keep in mind your hygiene (regular hand washing, no physical contact with other people, breath hygiene)!
<b>Risk minimisation:</b> If you have symptoms (fever, cough, breathing difficulties, ageusia) or are worried that you may have the virus, stay at home and call the phone number 1450.

I hereby declare that I have been informed about the protective measures; I have acknowledged them and I pledge myself to observe them.
