The following data are processed:

- name
- email address
- job description
- workplace description

The data will be obtained from you directly.

The purpose of this data processing is to be able to contact those persons providing names and email addresses in order to make a test version of the FlowMe software available to them and possibly to subsequently receive feedback on satisfaction in regard to FlowMe. The remaining data serve to evaluate the costs and typical work processes of persons analysing flow cytometric data for specific diseases.
