Welcome to TU Wien Research Data

TU Wien Research Data is an institutional repository of TU Wien to enable storing, sharing and publishing of digital objects, in particular research data. It facilitates the funders' requirements for open access to research data and the FAIR principles by making research output findable, accessible, interoperable and re-usable. This service is developed by the **TU Wien Center for Research Data Management** and hosted by **TU.it**.

Please note that this service is still under development and has limited functionality. We will add more functionality as development progresses.
