## APPEAR III Academic Partnership between

Makerere University  
(Uganda)

Technische Universität  
Wien  
(Austria)

Uganda Red Cross  
Society  
(Uganda)

Mbarara University of  
Science and Technology  
(Uganda)

## Clean and Prosperous Uganda – Fecal Sludge and Solid Waste Management for Improved Livelihoods (CPUg)

### Project Description:

Fecal sludge management (FSM) and solid waste management (SWM) are consistently recognized as being insufficient in many areas within Uganda. Oftentimes, the management of these two categories of waste are organized separately and executed with insufficient resources, political will, and funding. Nevertheless, there are many opportunities for value chain creation and valorization of materials, micronutrients, and energy content contained within solid waste and fecal sludge, especially when considered together. The project team will explore circularity concepts, test a variety of techniques for utilizing dried fecal sludge (e.g., co-firing, co-composting), and target national plastic waste management (e.g., analyzing plastic recovery and recycling paths). Through which, this project aims to examine how to best optimize and integrate FSM and SWM in urban settings in Wakiso District, refugee settlements in Arua District, and for Uganda more broadly. The results of such work are expected to improve waste-related knowledge gaps, build capacities of stakeholders at the university and municipal level (e.g., local authorities and service providers), and change perceptions of fecal sludge-derived products by end-users (primarily subsistence and commercial farmers). These actions, in turn, are expected to improve upon the livelihoods of many Ugandans, to include women and refugees, by reducing their exposure to harmful pollutants and pathogens, all while sustainably creating new economic opportunities in recycling, composting, and energy recovery.

### Planned project consortium:

- Technische Universität Wien (project coordinator), Institute for Water Quality and Resource Management, Vienna, Austria  
Therese Schwarzböck, Richard David Lee, Sabine Dworak, Jakob Lederer, Johann Fellner
- Makerere University, College of Agricultural and Environmental Sciences, Kampala, Uganda

Jeninah Karungi-Tumutegyereize, Alice Turinawe, Allan John Komakech, Joseph Jaggwe

- Uganda Red Cross Society, WASH program, Kampala, Uganda  
Grace Kyagaba
- Mbarara University of Science and Technology, Department of Environmental and Livelihood Support Systems, Mbarara, Uganda  
Elias Oyesigye

**APPEAR Programme description:**

APPEAR is a programme of the Austrian Development Cooperation (ADC) with the aim to realize its strategy for support of higher education and research for development on an academic institutional level. The overall objective is to strengthen the scientific foundation and institutional capacities in higher education, research and management in the partner countries through academic partnerships with Austrian higher education institutions. Furthermore, APPEAR aims to increase the commitment to international cooperation and development at Austrian higher education institutions.
