

Benchmarking

(Benchmarking) für die österreichische Abfallwirtschaft

The aim of this research project was to determine the status quo of Austrian waste management and to assess the level of target achievement (resource conservation, environmental protection and sustainability) with respect to associated. The work was carried out under the project management of the Vienna University of Technology jointly by the University of Natural Resources and Life Sciences - Vienna, Montanuniversität Leoben and University of Innsbruck. This project was commissioned BMLFUW together with the ARA, the VÖEB and seven Austrian federal states (Carinthia, Lower Austria, Salzburg, Styria, Upper Austria and Vienna).
