

The Institute of Statistics at TU Graz is offering a full-time (40h per week)

Postdoc research position in Statistics.

The duration (between 12 and 36 months) and the starting date are subject to negotiations.

The position is within the FWF-funded project P 35520 “*Analysing functional data by approximate factor models*” led by Prof. Siegfried Hörmann. The hired person is expected to work on problems in functional or high-dimensional statistics.

Your profile:

- Completed doctorate in mathematics or statistics.
- Strong background in multivariate statistical methods and asymptotic inference.
- Proven capability of publishing in high quality international journals.
- Good experience with software implementations.

We offer:

- An active research group, flexible working conditions, collaboration with international experts in the field related to the project.
- A monthly gross salary of € 4,351.90 according to the salary scheme of the Austrian Science Fund (FWF).

Applications with a CV and a letter of motivation should be sent to shoermann@tugraz.at. The position will remain open until filled.
