

Invitation

Electrochemical Conservation Training School

“INTRODUCTION TO THE USE OF ELECTROCHEMICAL / ELECTROLYTIC TECHNIQUES IN METAL CONSERVATION”

Lecturer: **Prof. Dr. Christian Degrigny**

The Training School will provide an introduction to the use of electrochemical techniques applied to the conservation-restoration of metals, from the basic principles to the most innovative approaches. Through a combination of lectures and practical work, participants will train electrochemical techniques on metals and their corrosion products, in order to define the best conditions for cleaning and stabilizing metal artefacts.

Venue:  Bundesdenkmalamt, Arsenal, Objekt 15, Tor 4, 1030 Vienna, Austria

Fee: € 300.00 (payable on the first day on site; lunches and coffee breaks are included)

Contact & Organisation:

Valentina Ljubić Tobisch
Technische Universität Wien, X-Ray Center
Getreidemarkt 9, 1060 Vienna

Send your registration and a short note whether you have already had experience with electrochemical methods in metal conservation to

valentina.tobisch@tuwien.ac.at

The course and the lectures will be adapted to the knowledge of the participants!
