

Ian Banerjee (Urban and Futures Research)

After growing up in Asia, Africa and Europe, Ian Banerjee studied architecture and urban planning in Vienna and Brazil. His teaching and research activities revolve around future topics in urban development with a focus on digitalization. He is particularly interested in success stories in urban planning and has gained experience on the topic of urban innovation in over forty cities worldwide. He is currently working on ways of communicating science using graphic novels, and is writing a handbook for students on methods of “Futures Thinking”.
