FEMtech Internship on Computer Vision

Revolutionary Technology Systems (RevTec) develops 2D and 3D computer vision solutions for the automation of live-game operations in casinos. Using both Machine Learning and classical methods, our image analysis tools monitor in real-time individual tables, optimizing marketing, security, and performance.

We are currently looking for a FEMtech intern to help us expand the capabilities of our system. The project consists of researching available face recognition techniques and assess their feasibility in the context of our system. The result should be a proof of concept fulfilling the necessary requirements.

FEMtech Intern for Face Recognition Project

Your Tasks

- Review current face recognition technologies (SW und HW)
- Perform feasibility study of relevant technologies
- Setup and test selected technology
- Compile proof of principle results

Your Profile

- Experience with python
- Experience with image processing libraries
- Ideally experience with Machine Learning frameworks
- Interested in working both with SW and HW
- Good knowledge of German
- You enjoy being part of a small corporate startup

We offer

- A flat hierarchy with open doors
- A dynamic company developing hi-tec solutions
- A young team of experts
- Clear goals with a large impact in our products
- FEMtech renumeration over six months

The casino industry is undergoing a digital transformation – be part of it developing computer vision solutions with us. Your application does not need to be long: send us your CV and a couple of lines describing your motivation for applying. We are happy to address any question you may have and look forward to your application.
